PROFILE

Full stack developer trained in multi-platform application development, holding a master's degree in cybersecurity. Experience in SAP consulting, full stack development in the biotech sector and personal projects taken from idea to production, including Nexora, a complete SaaS ERP. I work confidently across frontend, backend and security, and adapt quickly to new technologies.

EXPERIENCE

Full Stack Developer — Origen Corporation Biotech

2024 – 2025

Full stack development of web applications: Angular on the frontend with .NET and Node.js backends.

ABAP Developer — Inetum

2023 – 2024

ABAP development on SAP across the finance and logistics modules: debugging and fixing existing programs, and building new ones.

PROJECTS

Nexora — SaaS ERP for in-store businesses

Cloud ERP for in-store commerce (beauty, retail, hospitality) with a multi-brand franchise model. Planned documentation-first and executed through verified milestones all the way to deployment: scheduling, touch POS, certified legal invoicing (VeriFactu · Spanish Tax Agency), cash management, inventory, time tracking, reports and a WhatsApp AI receptionist. 30 modules · 57 milestones · 532 automated tests · security audit 14/14. Stack: NestJS, Angular, PostgreSQL, Prisma, Redis, Docker, Playwright.

Estética Inefable — esteticainefable.es

Corporate website built with WordPress, including hosting management.

PSecureWD — Final degree project

Mobile password manager: React Native (Expo) app with Google sign-in and an Express + MySQL API.
